

Plantar Fasciitis and Painful Plantar Heel Spur (Bone Growth)

Minimal Incision Surgery

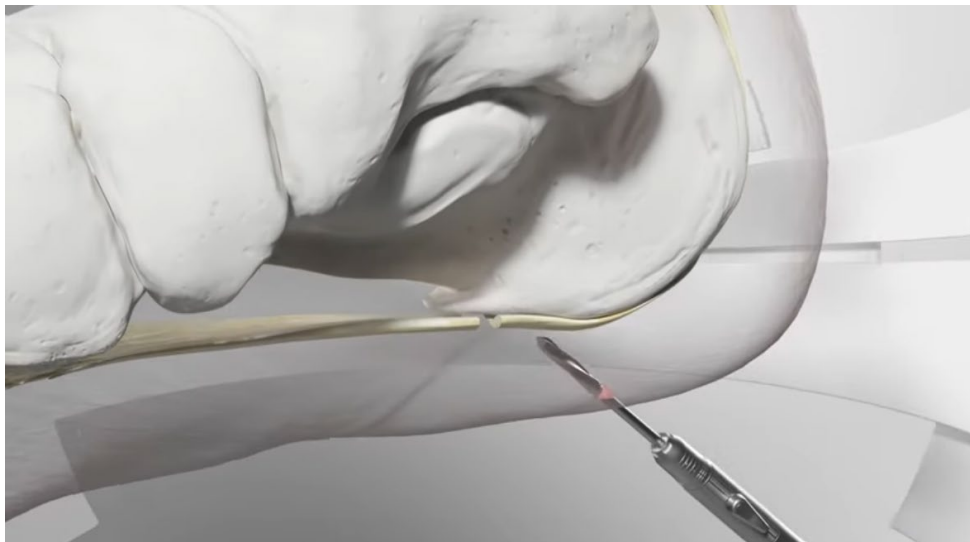

Are you suffering from heel pain? Does it hurt after you get out of bed or get out of a chair while at rest? Does it limit your daily activities of living? Do you have pain at work? Is the pain limiting your ability to enjoy life? If you enjoy walking, playing golf, running, skiing, jogging, dancing or any other activities then we can you achieve your pain free goals.

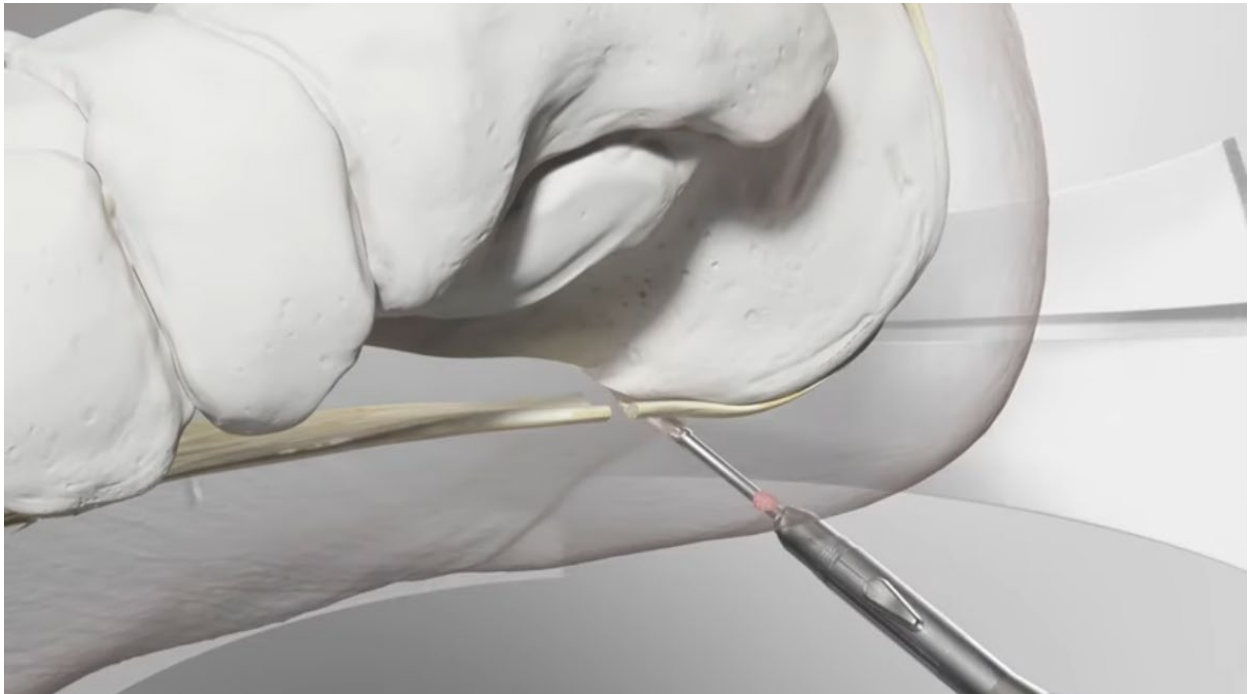

Pain is typically at the plantar medial heel and arch

A small incision is used to transect the ligament attached to the heel spur.

Then a specialized instrument is inserted through the same hole onto the painful heel spur.

The Painful Heel Spur Has Now Been Removed
